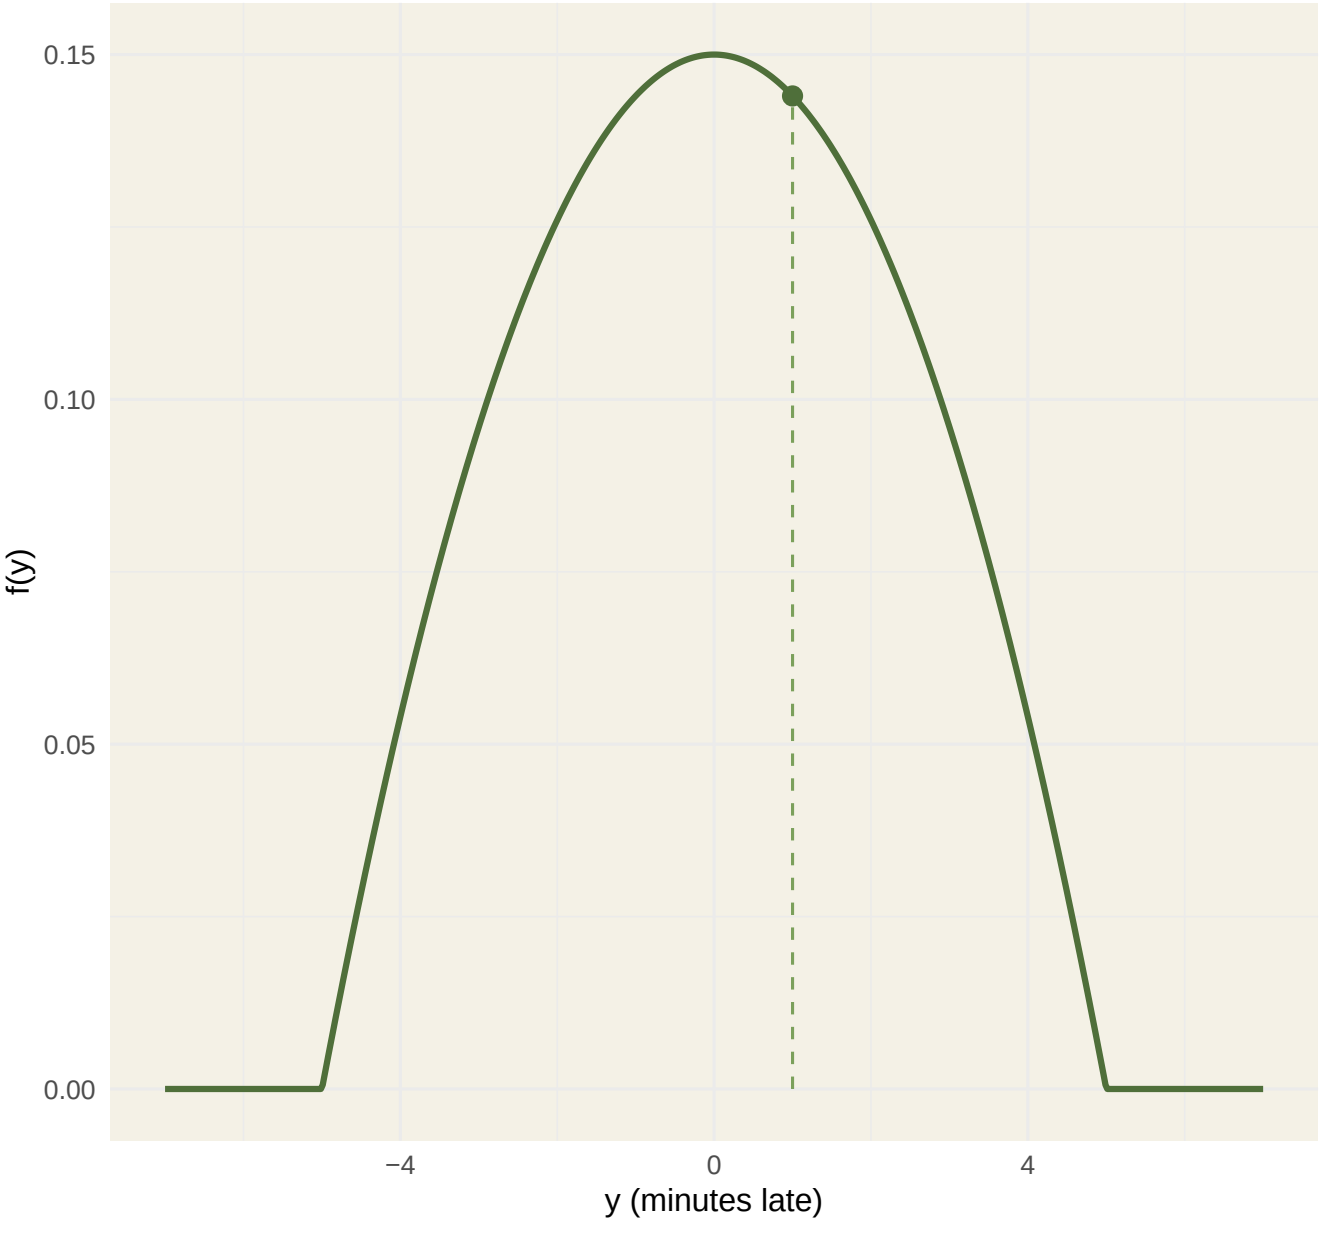
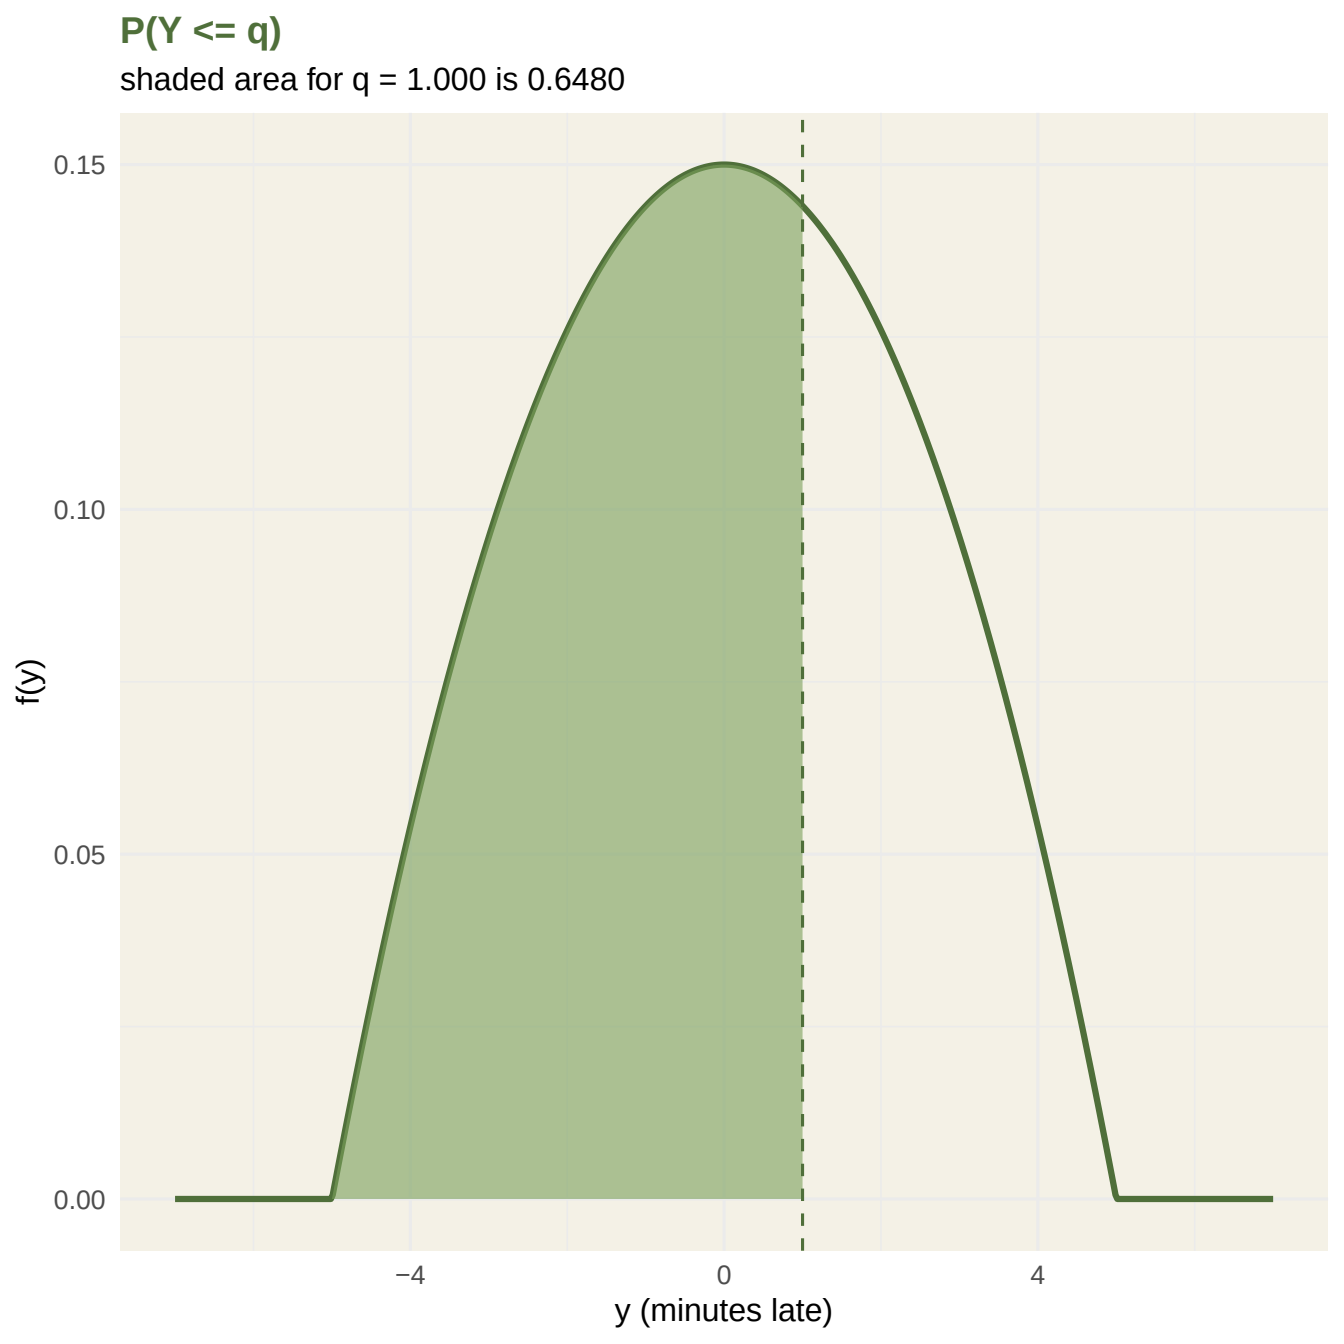
Train lateness density f(y)

points show f(x) at the values you gave





P(Y <= q)
shaded area for q = 1.000 is 0.6480

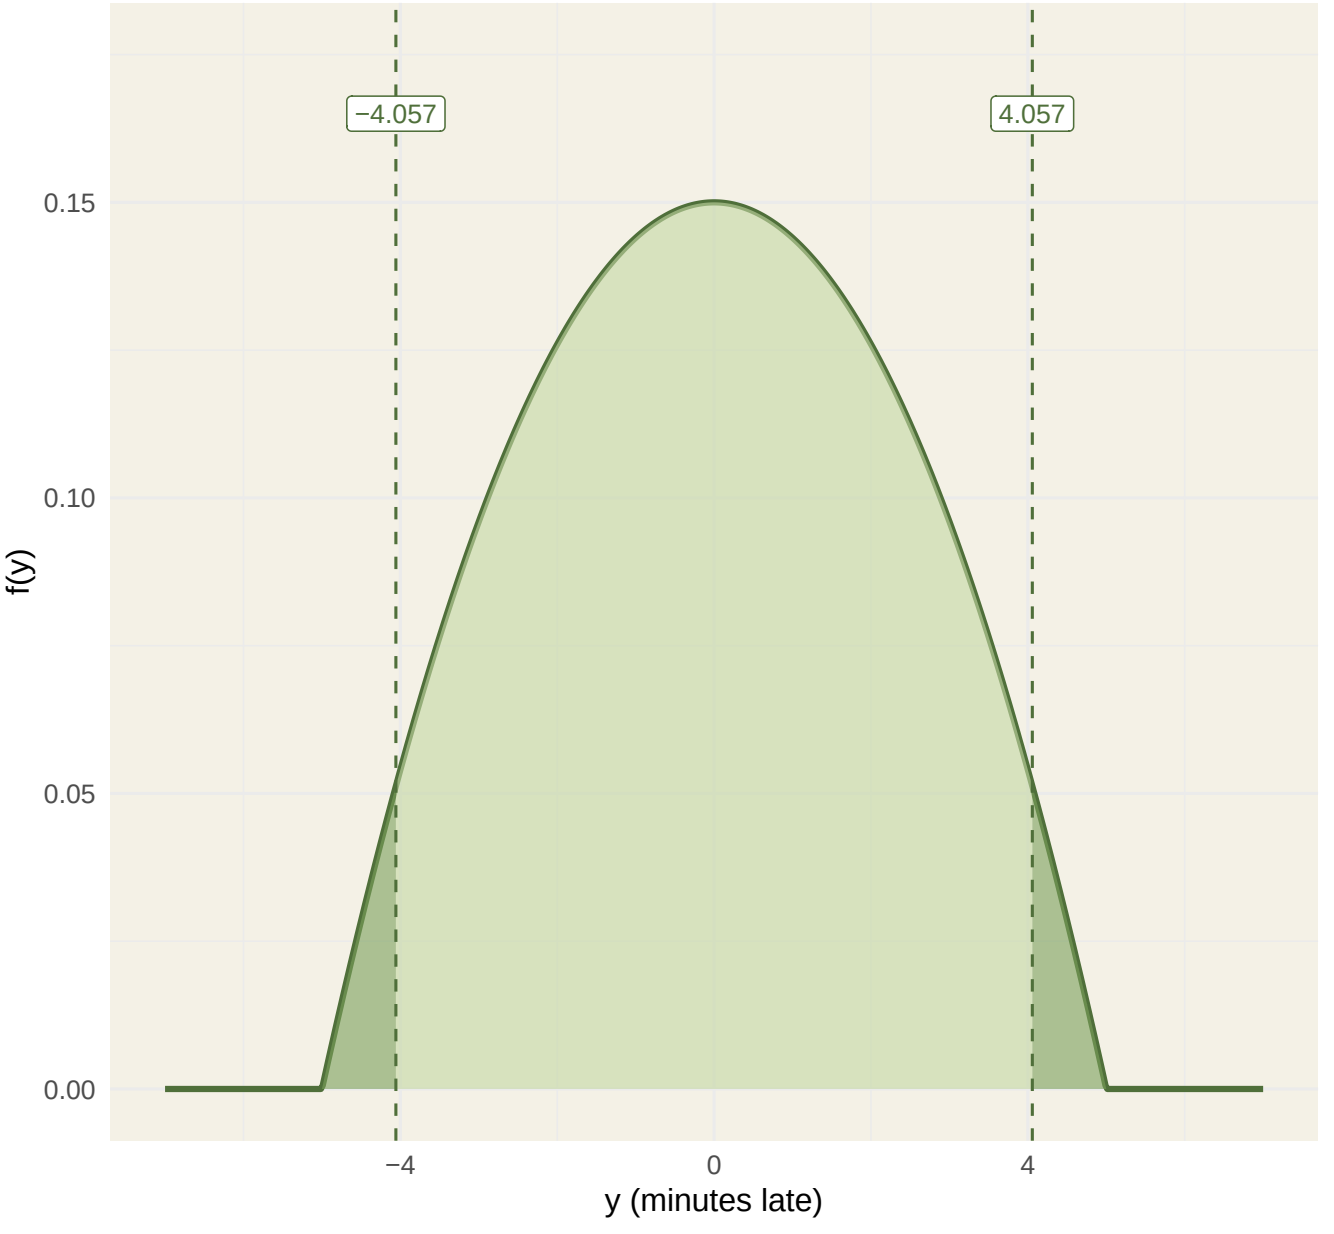
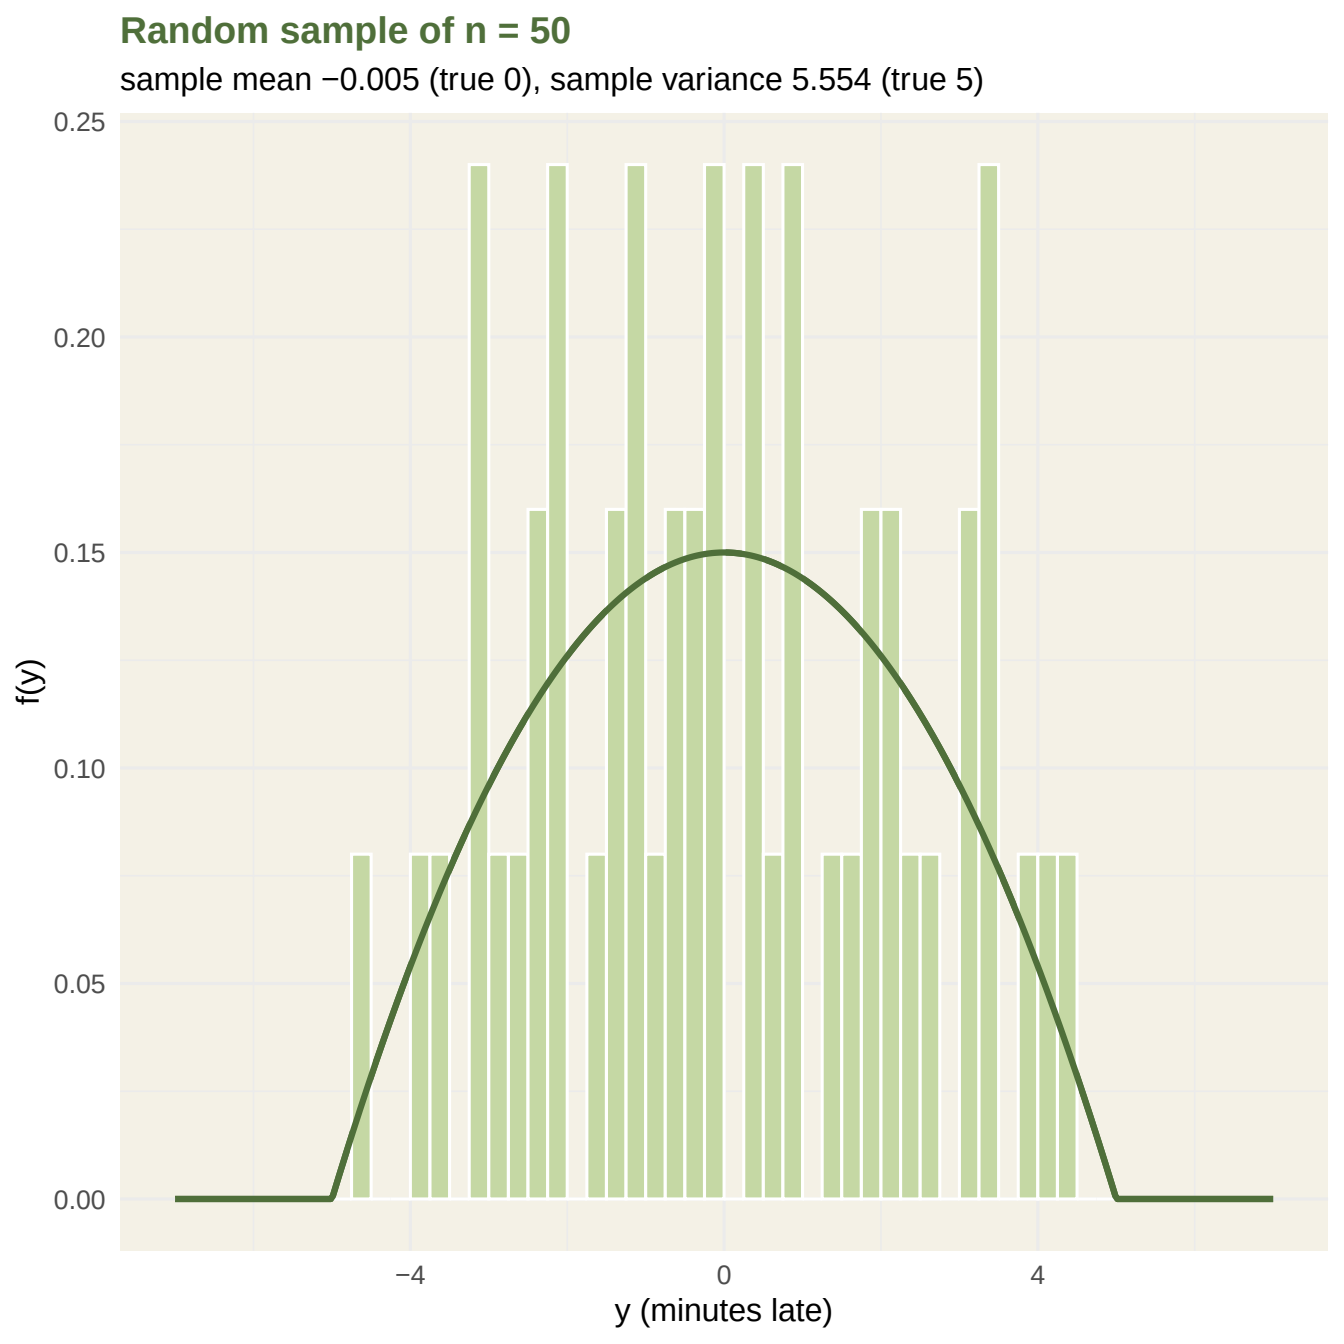
Train lateness quantiles

dashed lines are the quantiles, shaded areas are the tails





Random sample of n = 50
sample mean −0.005 (true 0), sample variance 5.554 (true 5)
